

Thank you very much for contacting me regarding high school math competency in Washington. As you know, I have sponsored legislation that creates an independent review committee to evaluate Washington's math program. The committee will make recommendations to the governor.

For your information, I have attached a copy of the most recent version of my bill. I want you to know it will be heard in a public hearing on Monday, February 5, at 1:30 pm in Senate Hearing Room 4.

If you or your friends have an interest in the discussion, I encourage you to follow this closely and make the members of the legislature aware of your views. If you choose to testify during the hearing, you may sign in at the committee hearing and voice your opinion. Please feel free to contact my office for further information.

I applaud your commitment to excellence in public education, and appreciate your willingness to take an active role in making it happen.

I consider it a joy to serve on your behalf.

Sincerely,

A handwritten signature in cursive script that reads "Cheryl".

Deputy Republican Leader

5th Legislative District
